

IX FUSION
SERVICES

INTEX

THE FASHION SOFTWARE COMPANY

INTEX – THE FASHION SOFTWARE COMPANY

We are no “off-the-shelf” software company, we are “The Fashion Software Company”. A specialist that knows the fashion industry like the back of its hand. And has done so for nearly 30 years. Over 400 customers have already come to appreciate our expertise, responsiveness and precision. There is barely a process in the textile supply chain in the last three decades that has not yet been developed and implemented by Intex.

Our strengths have always been to surprise with innovative solutions time and again and to adapt to the rapidly changing markets and growing customer demands. IX Fusion is the best proof of this. As leading provider of ERP and PLM solutions in the fashion market, Intex is a Microsoft Gold Partner – for all those still in need of a label.

If you would like to know more about best practice, customised application scenarios, comprehensive tools for analysis, KPI observation, the use of data warehouses, business logic, multi-tiered approaches and the latest standard in HTML5, please visit our website (www.intex.de) or get in touch with us for a personal appointment.

INTEX ENSURES
A SMOOTH
IMPLEMENTATION

OUR IT-SERVICES – FAR MORE THAN JUST AN ACCESSORY.

Not only do we have software solutions in stock, we also offer comprehensive IT services. From hardware delivery and installation over hosting services up to consulting and planning of complete technical infrastructures in the shop no wish

remains unfulfilled.

This own business division within the whole company convinces by extensive know-how, favourable conditions, fast reaction times and a wide range of services.

FROM ERP PROVIDER TO IT SERVICE PROVIDER.

- IX FUSION SERVICES is a division of INTEX EDV-Software GmbH.
- INTEX has its origin in the clothing industry.
- Since 30 years with FASHION ERP on the market.
- Many years of IT experience.

- 2012 Expansion of the business area in Germany.
- Our own IT service center.
- IT system house for all industries since 2012.

FASHION ERP and IT SERVICES

We can do both!

MANY YEARS OF EXPERIENCE IN FULL-IT-SERVICE.

Today, the availability and efficiency of IT systems is a business-critical factor for all customers! Consulting, conception and operation of IT and telecommunications infrastructures have therefore always been part of the services provided by INTEX.

The demand for services for INTEX's own IT systems has increased in recent years on the part of INTEX customers. In addition, there are more and more requests from companies from other industries and of any size.

For 5 years, INTEX has been operating ERP hosting in the high-end data center in Germany: (outsourcing of merchandise management, EDI, e-commerce, FiBu, etc. applications) => INTEX Cloud.

Sale of hardware and systems. => From network components to workstation equipment – individual and inexpensive.

Complex system landscapes, hardware/servers, databases, decentralized working, IT security, HA architectures.

SYSTEM-SUPPORT

- IT services
- Support
- Hardware
- Installation
- Maintenance

OUR SERVICES:

Administration of your servers and your entire IT network including security, updates, WAN/VPN.

User support for client computers, printers, etc.

On-site or remote support for servers and client systems as well as network components.

Monitoring of system messages (hardware, hard disk storage, services, databases).

Delivery and installation of backend systems (servers, network components, racks, etc.).

Delivery of hardware of any kind (network, server, clients, tablets, peripherals, etc.).

YOUR ADVANTAGES:

You buy IT services and support as needed.

You need to maintain less internal IT know-how.

You benefit from the experience of our experts in the various subject areas.

You rely on standards and established solutions.

We take care of it.

CLOUD-SERVICES

- Outsourcing of critical and complex IT systems
- Price model: billing per use and month
- Location-independent access to all applications
- Security and backup service

OUR SERVICES:

Provision of a powerful infrastructure for ERP and all satellite systems.

Guaranteed availability of at least 99.5% per year.

Redundancy at all levels (server, data storage (SAN), network components, Internet connection, etc.).

Use of branded hardware for servers and network components.

All-inclusive service package: backup, monitoring, update service, IT security.

Hosting in a professional German computer centre (access control, fire protection system, emergency power supply, etc.).

Support and maintenance by certified IT experts.

YOUR ADVANTAGES:

Minimize costs: No investments and no loss in value of your own expensive server landscapes and operating system updates. Security patches are covered by the hosting fee.

Maximize reliability and load reserves: Benefit from our professional, high-performance, redundant platform.

Scalability: Through the use of virtual servers, storage space, computing power and number of users can be adapted during operation.

Full flexibility: Access from all branches, home offices, trade fairs, etc. possible - even with low bandwidth.

SYSTEM-CONSULTING

- Consultation
- Analysis & Conception
- Organization
- Infrastructure
- Systems

OUR SERVICES:

Conception and consulting of partial and complete solutions for IT and telecommunications infrastructures.

Dimensioning and conception of servers, networks, active and passive network components and storage solutions including network documentation.

Implementation of redundancy and load distribution at all levels.

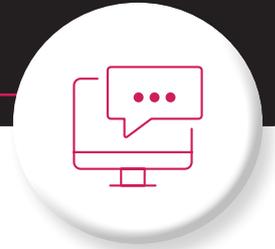

YOUR ADVANTAGES:

Our partnership-based consulting supports your own idea and planning of your own IT and telecommunications infrastructures.

Benefit from the experience of our experts from a variety of projects.

Avoid mistakes that others have already made.

ERP-SYSTEMS

- Freedom of planning
- Liquidity & TCO
- Flexibility & Mobility
- Time-to-Market
- Risk minimization
- Secure data transmission

OUR SERVICES:

Today, sophisticated ASP solutions offer opportunities for large and small companies that were previously only available to companies with extensive IT infrastructures.

INTEX ERP is completely cloud capable. The applications are hosted in a high-performance data center in Germany, access to INTEX is exclusively via secure Internet connections. Especially if you want to use your ERP system mobile, a cloud solution will inspire you. Enjoy flexibility across multiple locations and use across different end devices, even in combination with online solutions (B2B/B2C).

The security of your data is guaranteed by state-of-the-art encryption technologies.

YOUR ADVANTAGES:

You benefit from the know-how of our experts. We take care of the availability of the ERP application and ensure the security of your data.

The INTEX Cloud is also financially attractive for you:

you do not have to pay for the system infrastructure and database licenses. Instead, we charge a monthly fee, which also covers the ongoing operating costs.

Flexibility. Cost advantages, future security, increased efficiency and the creation of competitive advantages thus support your success.

SHOP-SYSTEMS

- Network
- Audio
- Video surveillance
- People counter
- Digital signage

OUR SERVICES:

Networks: Network planning and consulting (network, server, backup, security, virtualization, etc.).

Audio: Tailor-made sound solutions for retail stores.

Video surveillance: Planning and installation of surveillance solutions including recording.

People Counter: Measurement of visitor frequency and optimisation of personnel deployment, turnover and assortment.

Digital Signage: Simple advertising and information displays, video walls, LED walls.

YOUR ADVANTAGES:

Worldwide installation of uniform technical infrastructures.

Modernisation of the infrastructure / creation of worlds of experience and sound.

Optical integration into the overall architecture of the shop.

Central control of technical systems and global support.

Establishment of high security standards.

COMPETENCE OF THE STAFF

Reliable and experienced IT specialists are indispensable to ensure that information technology operations are always up and running.

Qualified & Certified – Our employees have a solid IT education.

System technology experts and consultants with more than 15 years of experience in IT system management.

As our customer, you benefit from a holistic approach and comprehensive conception.

OUR EXPERIENCE AND EXPERT KNOWLEDGE FOR YOUR ADDED VALUE.
