IX FUSION CLOUD

INTEX
THE FASHION SOFTWARE COMPANY

INTEX Cloud
ERP system as hosted solution

Cost advantages, future security, increase of efficiency and creation of competitive advantages for your success.

HIGHLIGHTS

- Planning freedom
- Liquidity & TCO
- Flexibility & Mobility
- Time-to-Market
- Risk minimization
- Secure data transmission

Users demand more mobility.

Sophisticated ASP solutions today also offer opportunities to smaller fashion companies that were previously only available to large companies with extensive IT infrastructure.

The cloud capability of the INTEX ERP application enables you to operate INTEX as ASP (Application Service Providing). This means that the servers with the INTEX ERP applications are hosted in a powerful data center in Germany. INTEX can only be accessed via secure Internet connections. In particular, if you want to use your ERP system on the move, a cloud solution is the right solution. The INTEX Cloud offers you the necessary flexibility across several locations, with different end devices (Windows, Mac, Smartphone, Tablet) and in combination with online solutions (B2B, B2C)..

The security of the data is guaranteed by state-of-the-art encryption technologies..

Your benefits

With our service, you don't have to worry about hardware and software investments or security standards. We ensure the availability of the ERP application, your data and their security. You benefit from the know-how of the INTEX specialists and do not have to build up and expand this technical knowledge yourself.

The INTEX Cloud is also financially attractive for you: There are no acquisition costs for system infrastructure and database licenses. Instead, you pay a monthly amount that not only covers the acquisition costs but also the ongoing operating costs.

IX FUSION CLOUD

INTEX
THE FASHION SOFTWARE COMPANY

INTEX Cloud
ERP system as hosted solution

Highlights at a glance

Planning freedom

- Independence from your own IT competence and particularly sought-after qualifications (skills).
- „State-of-the-art" with ever shorter innovation cycles for hardware and software.

Liquidity & TCO

- Lower IT investments and cost transparency through calculable and predictable costs.
- Low investment in client systems, as the computing power is provided in the data center.
- No investments in basic infrastructure (UPS system, air conditioning, backup solution, virus protection, etc.).

Flexibility & Mobilität

- Use of the latest technologies and current releases without own IT know-how.
- Temporary use of special applications, e.g. on a temporary basis or for selected users in a defined project.
- TEasy and fast access to INTEX ERP for new employees, sales, exhibitions, shop solutions or partners.
- Authorized users have access to the INTEX ERP, regardless of location, time or device.

Time-to-Market

- Rapid software introduction and deployment.
- Capacities can be used for the software implementation and migration process with INTEX.

Risk minimization

- Plannable and variable fees instead of fixed costs.
- Guaranteed availability of 99.5% p.a.
- Flexible working 24 hours a day, 7 days a week (time zone independent).

Services in detail

- Provision of the INTEX database (current Microsoft server and SQL versions) including access licenses.
- High-performance and redundant core switches with GB ports.
- Backup strategy (day, week) on tape, outsourcing weekly backup (locker house bank).
- Redundant Internet connectivity.
- Internet traffic (VPN, https etc.) as flat rate.
- VPN gateway as cluster solution and Quality of Service.
- Server monitoring with event manager.
- 24/7 electronic access control.
- Provision of INTEX Access Gateway within a DMZ, coupling of INTEX ERP application (INTEX DB).
- Provision of INTEX web server within a DMZ, connection/interface to the B2B / B2C system.
- Installation of independent INTEX client (INTEX ERP, INTEX Services, Business Objects etc.).
- Optional installation of Thirdparty applications.
- Optional configuration of interfaces.
- Air-conditioned server room with redundant air conditioners and monitoring function.
- Powerful stand-alone UPS system with diesel backup system with automatic network synchronization.
- Fire alarm system including extinguishing system.

User charges

- Provision costs p.m. for named users.
- Contract period 60 months.
- Acceptance, setup, configuration and system update of the complete system (INTEX ERP application, customer-specific system adaptations, print services, verification/adaptation of customer clients, etc.).
- Including support with regard to the guaranteed performance features and including update service of the system environment as well as implementation of necessary major releases.
- Access options to the INTEX ticket system.
